

Understanding the Cyber Threat to your Local Government

Cyber Attack Prevention

Cyber-attacks are becoming more sophisticated and potentially more damaging. You need to know how to react, not if, but when one occurs. Understanding the threat landscape and being properly prepared is your best defense. This seminar will address the current methods and goals of hackers targeting your operation.

Topics discussed will include:

- Recognizing what is and isn't a data breach / identifying fact patterns
- Cyber/privacy claims experienced by cities and counties / lessons learned
- Overview of LGIT's cyber insurance policy highlights / Incident reporting / breach response flowchart
- Risk management – resources and how to access LGIT Cyber Program

Speaker: Steve Robinson, Area President RPS Technology & Cyber

**WHEN: August 21, 2018
10:00am to 12:00pm**

**WHERE: Wicomico County
Youth & Civic Center
